

Bardia Nikbakhsh

Software Engineer

bardianikbakhsh@gmail.com · +989382701160 (WhatsApp, Telegram) · Mazandaran, Iran · github.com/bardianz

SUMMARY

Software developer with a focus on Python and Django. Experience with web applications and backend development, plus some experience building desktop and mobile interfaces with Python tools such as PyQt, Tkinter and Kivy. Has worked with machine learning libraries including Scikit-learn, TensorFlow and Keras, with a basic understanding of supervised, unsupervised and deep learning. Familiar with Linux, the command line and shell scripting.

SKILLS

Python · Django · Celery · PostgreSQL · MySQL · MongoDB · Redis · Docker · Git · Linux · Flutter · Machine Learning (Scikit-learn, TensorFlow, Keras) · PyQt / Tkinter / Kivy · C# / WPF

WORK EXPERIENCE

Python, Django Developer — Ebtekar Imen Saz February 2024 – January 2025

Worked on projects including building reservation and appointment-booking systems, and developing websites for fire-simulator projects, among others.

Python, Django Intern — Sepehrar System June 2022 – January 2024

Worked on projects including designing and implementing database schemas using Django ORM, and troubleshooting issues and bugs.

EDUCATION

Bachelor of Computer Science — MUST October 2020 – June 2024

Studied Computer Engineering at Mazandaran University of Science and Technology (MUST).

- Ranked 2nd in the Computer Engineering program
- Organized an AI seminar

PROJECTS

Personal Accounting Web Application — Django

Web accounting application for managing transactions, expenses, income and financial reporting.

Django Reservation System — Django · [live site](#)

Website with a Django backend, developed to fit a customer's specific requirements.

Flutter Application for Barbershop — Flutter · REST API

Android/iOS application for managing barbershop reservations, fetching and manipulating data through a REST API.

ToDoList and Notes App — Django · Bootstrap · [live site](#)

To-do list platform, deployed and live for managing daily tasks.

HR Management Software — Python · PyQt · MySQL

Desktop application enabling CRUD operations.

IMDB Web Crawling Software — Python · Kivy · BeautifulSoup

Web scraping project with a Kivy GUI to extract and visualize data from IMDB.

Library Management App — C# · WPF · .NET · SQL Server

Desktop application for managing a library.

Instagram Profile Picture Downloader — Python · Qt

Fetches profile data from Instagram and lets the user download profile pictures.

Currency Checker Software — Python · Qt · Selenium

Desktop app that fetches the latest USD exchange rate in real time and displays it in a simple GUI.

Icon Converter — Python · Qt

Desktop tool that converts common image formats to ICO through a simple GUI.

DNS Changer — C# · .NET · WPF · Django · DRF · [service](#)

Windows WPF app that retrieves DNS configurations from a Django REST API and applies them to the system's network settings.

MILITARY SERVICE

Mandatory Military Service — Navy of the Iranian Army 2024 – 2026

Completed.

CERTIFICATES

5 Real-Time Use Cases using Machine Learning — Udemy 08/05/2023

Seminar on Data Science & AI Influences 2023
